# Play Framework

---

# Play 'Full Stack' Framework Set

---

# Web Applications - Request/Response

---

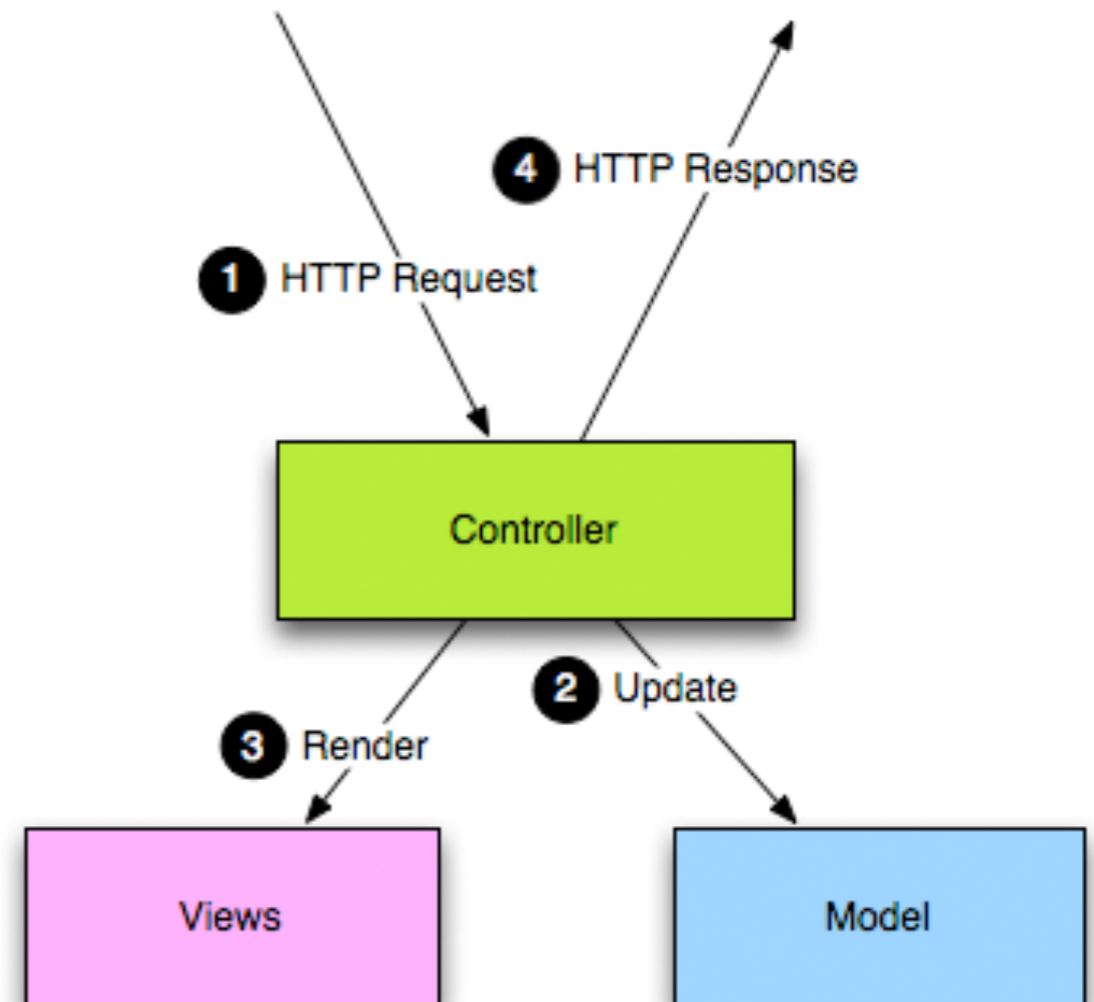

- Request - http request emitted by browser as a result of url in address bar, link, button or form submission on page
- Response - web page returned from service to be presented in browser

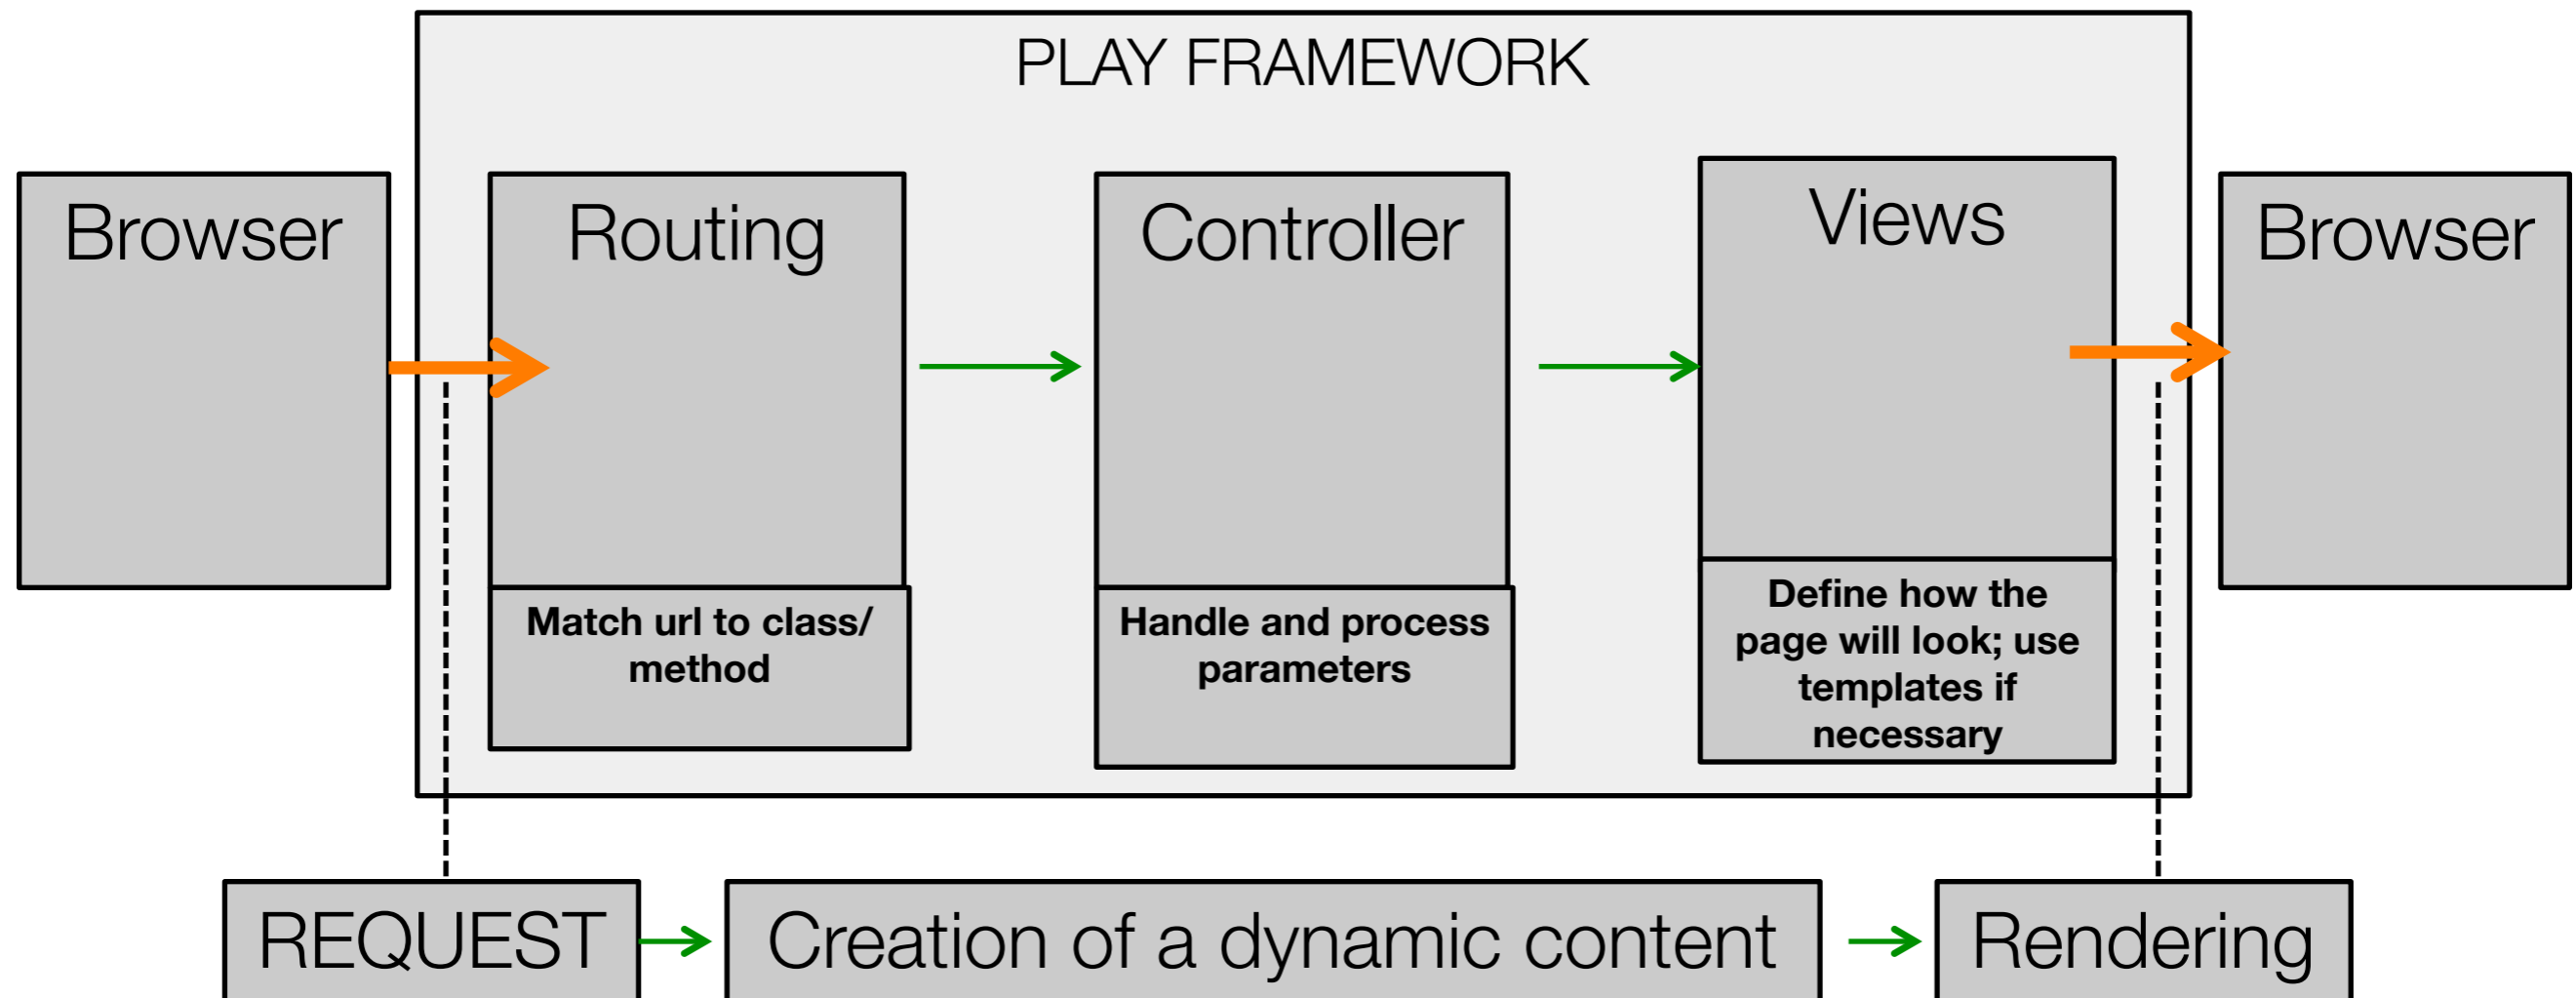

# Web Applications - MVC

---

- Model View Controller is a generally accepted pattern or separation of concerns within the server
- **Model:** Core application domain model + database persistence
- **View:** User Experience
- **Controller:** Directly handle all requests, mediate with Model, build and assemble the response using the views

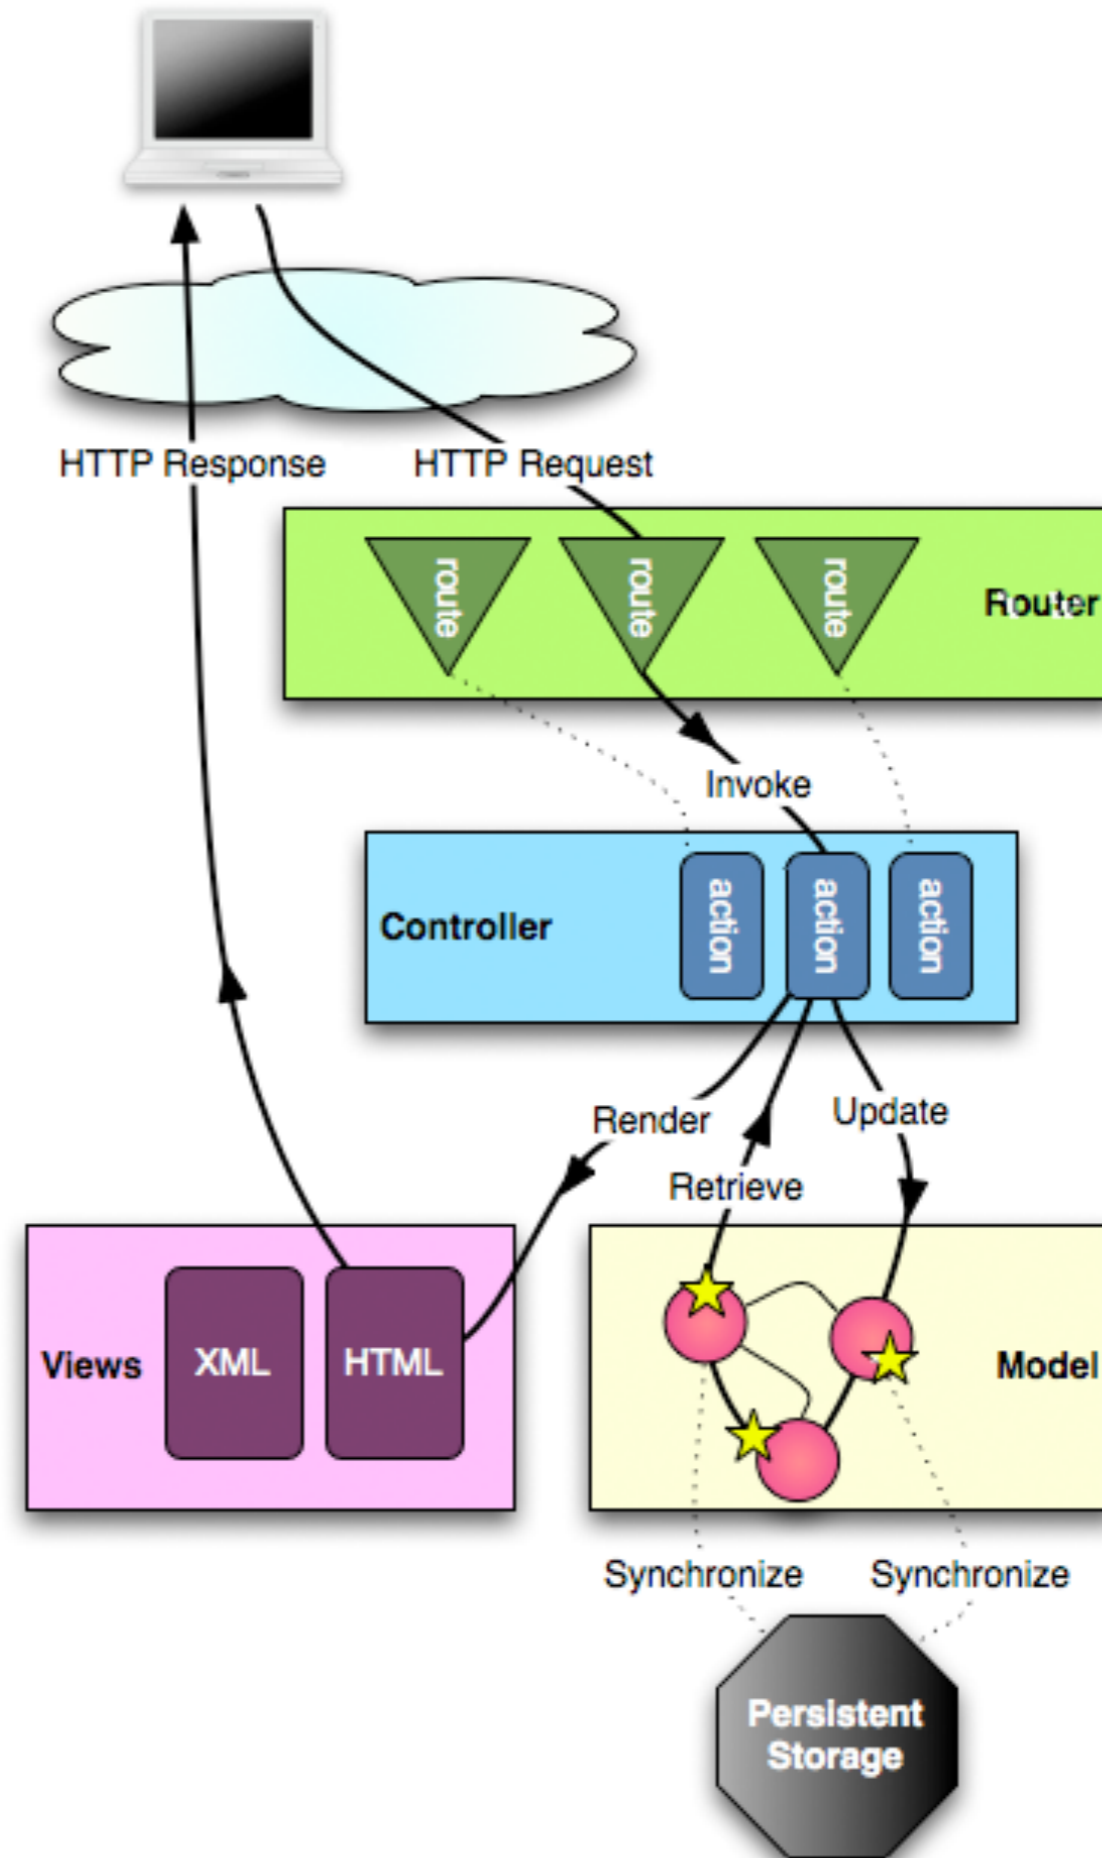

# Request/Response Lifecycle

# MVC in Play

- Router: examine incoming requests and match to corresponding Controller/Action
- Action: a method in the controller

# Routes - UI

---

```
# UI

GET      /                controllers.Accounts.index()
GET      /signup          controllers.Accounts.signup()
GET      /login          controllers.Accounts.login()
GET      /logout        controllers.Accounts.logout()
POST     /register        controllers.Accounts.register()
POST     /authenticate    controllers.Accounts.authenticate()

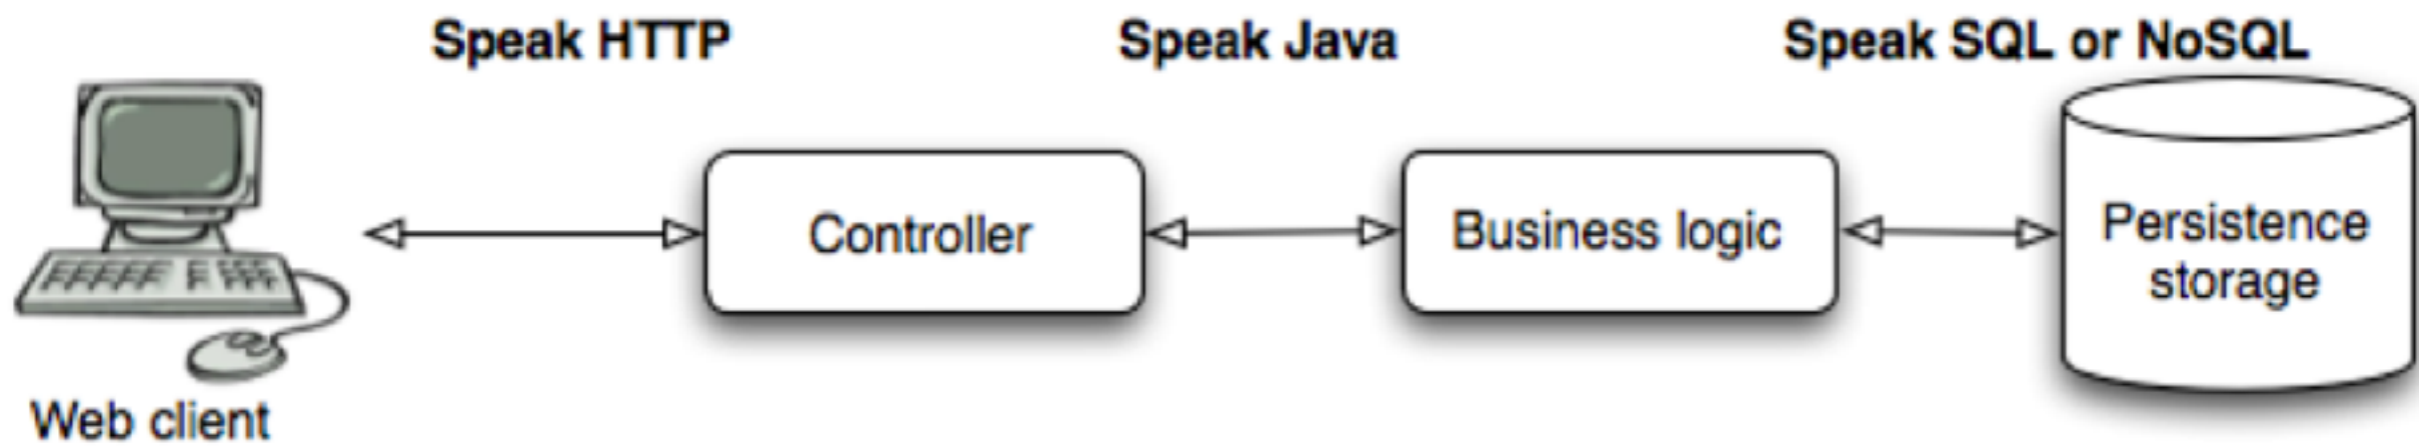

GET      /dashboard      controllers.Dashboard.index()
GET      /upload          controllers.Dashboard.uploadActivityForm()
POST     /submitactivity  controllers.Dashboard.submitActivity()
```

- Routes to deliver UI
- Each of these routes appears in views
- Each of these actions generates and returns a complete HTML page

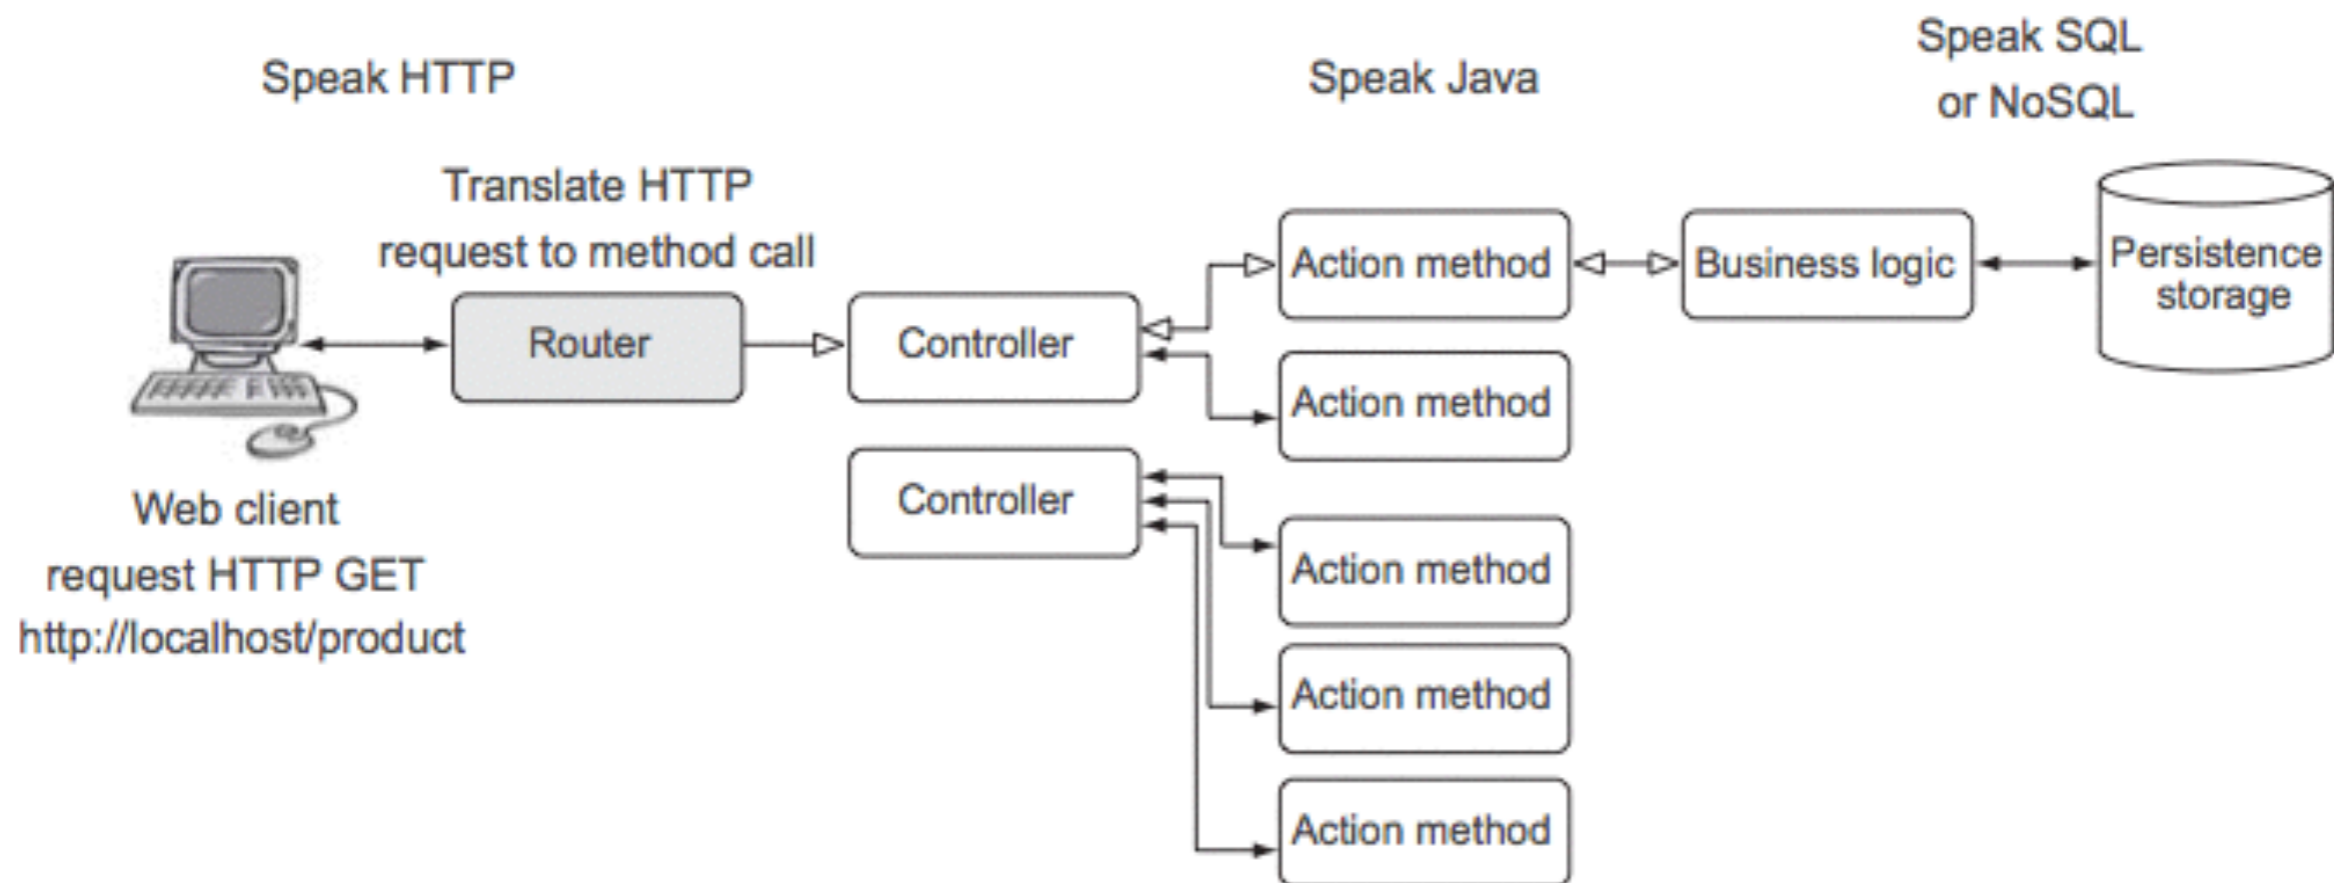

# Role of Controller

---

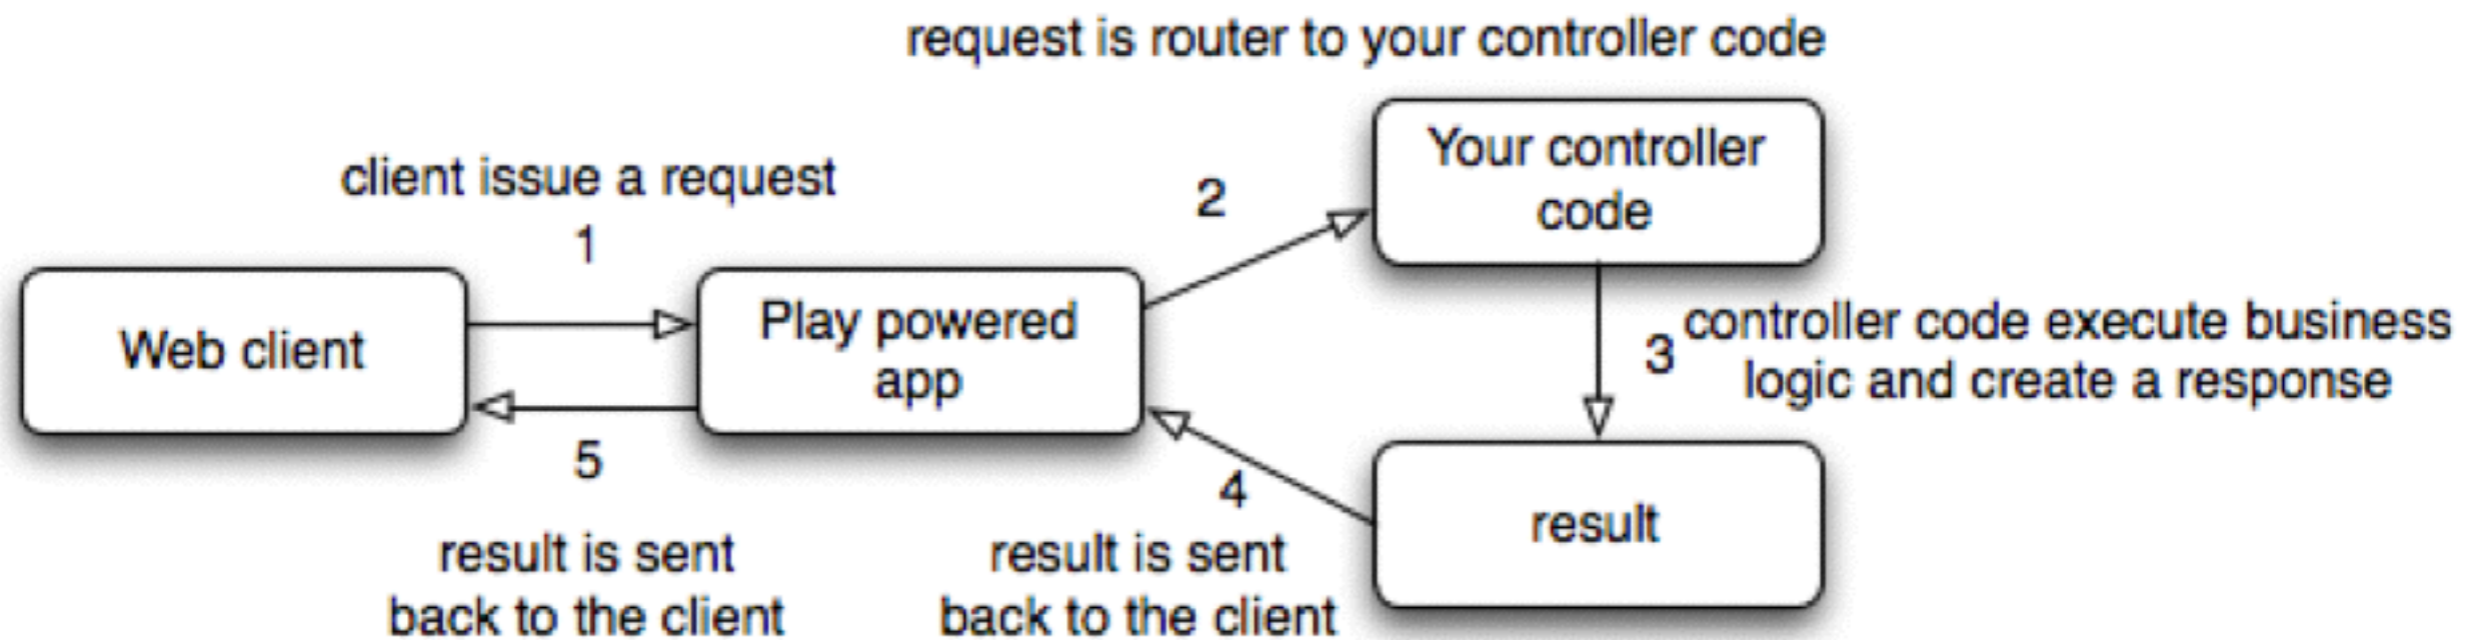

# Role of Controller / Actions

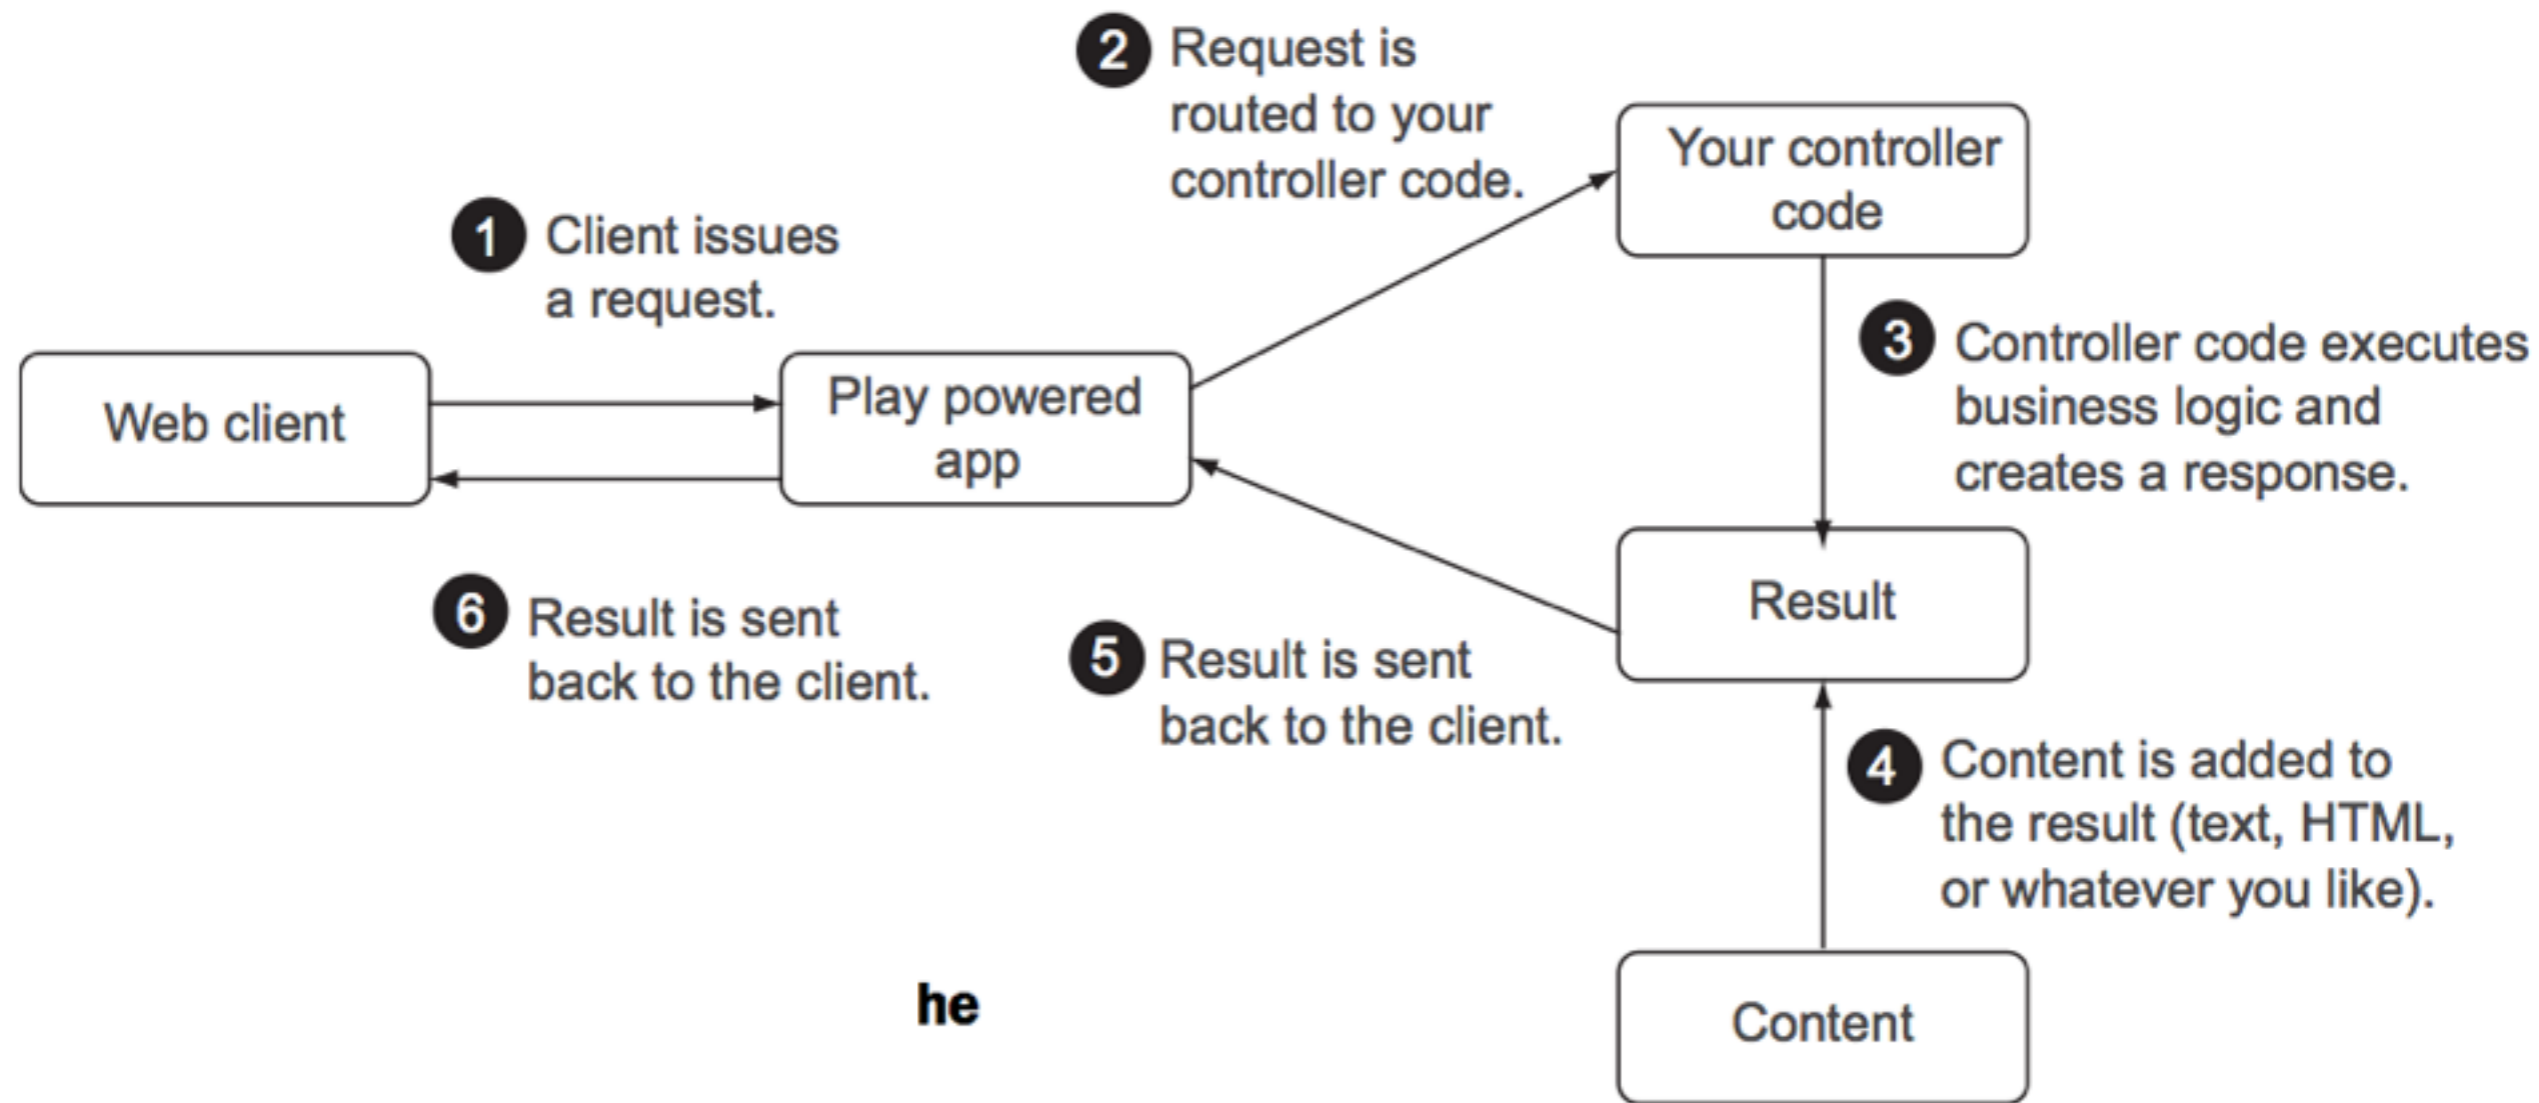

# Controller Lifecycle

---

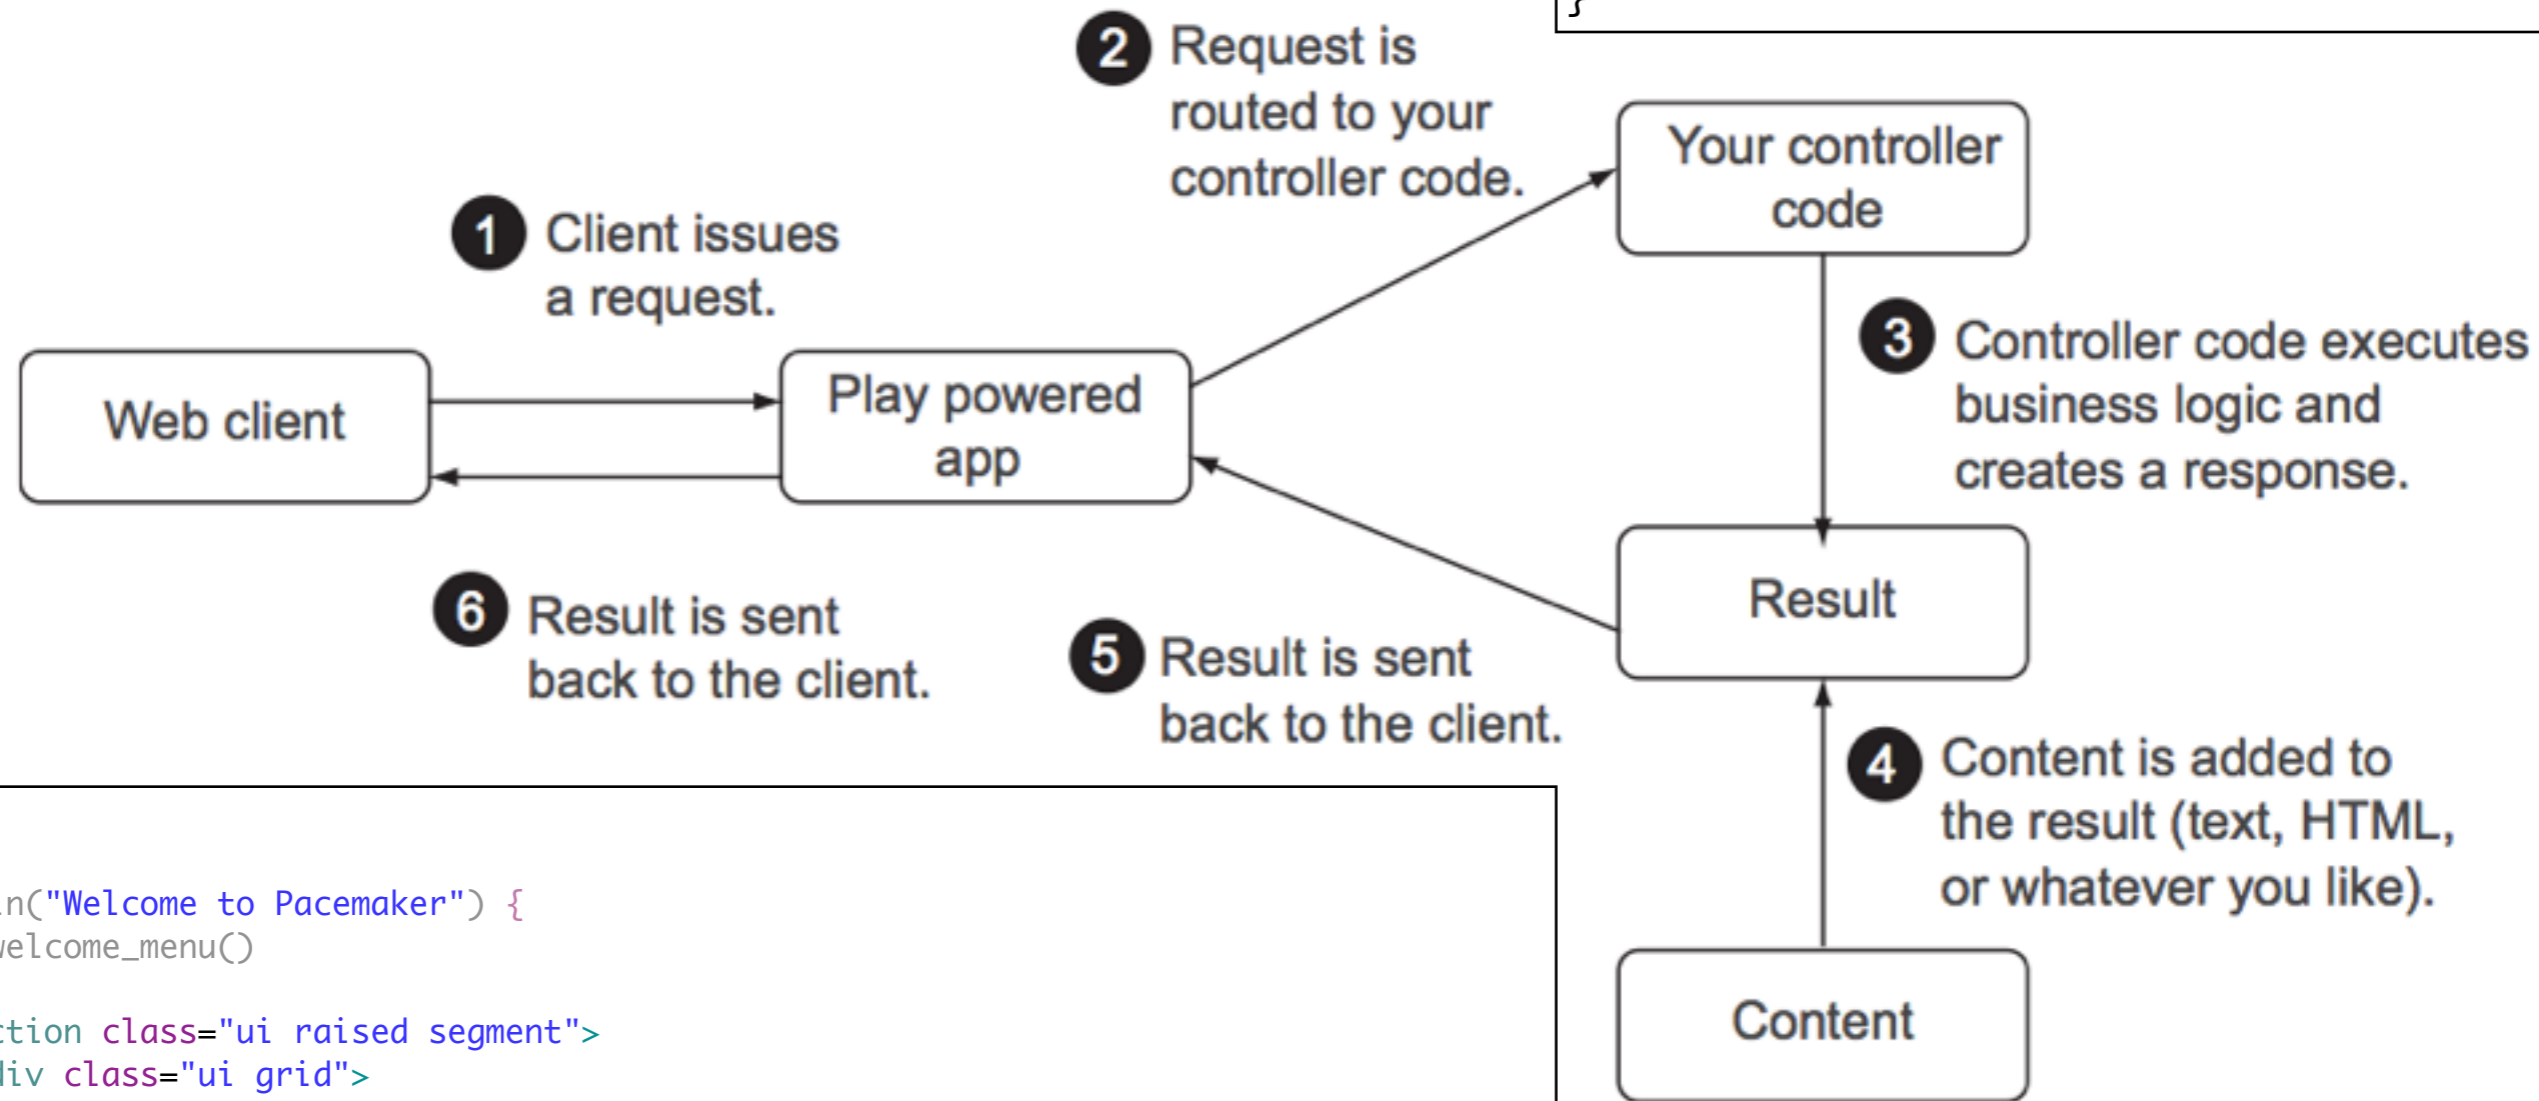

# Controller Lifecycle with Content

he

# Controller Lifecycle with Content

```
public class Accounts extends Controller
{
    public static Result index()
    {
        return ok(welcome_main.render());
    }
    ...
}
```

```
@()
@main("Welcome to Pacemaker") {
    @welcome_menu()

    <section class="ui raised segment">
        <div class="ui grid">
            <aside class="six wide column">
                
            </aside>
            <article class="ten wide column">
                <h1 class="ui header"> Sign up for Pacemaker </h1>
                <p> No Bitcoins accepted! </p>
            </article>
        </div>
    </section>
}
```
